

JOB POSTING #ProjectGeologist

PROJECT GEOLOGIST

Premium Nickel Resources Botswana (PNRB) is seeking a Project Geologist. Under the supervision of the Senior Geologist & Exploration Manager, the Project Geologist plans, carries out and supervises exploration activities on the assigned project areas.

Specific responsibilities include (while not limited to):

- Ensuring that COVID-19 protocols are followed
- Managing contractors and ensures that time sheets are verified
- Responsible for execution of approved drill programs - both completing tasks listed below and supervising those to whom the tasks have been delegated
- Logging drill core and mentoring those assigned to log drill core
- Ensuring up to date cross-sections are maintained, and quick logs are reported
- Ensuring core technicians and samplers follow established SOPs
- Logistics relating to drill pad and trail preparation, spotting, and stopping holes, and rig moves
- Communicating logistical or drilling problems to supervisor and working with drillers to solve these issues
- Discussing drill hole results and drilling strategy on a daily basis with exploration team and supervisor, including sharing of geological knowledge
- Planning field work and supervising field crews
- Collecting and compiling new geological observations and samples
- Integrating geological, geochemical, and geophysical information to generate interpretations

Qualifications:

- Minimum of a Bachelor's degree (B.S) in Geology or Geologic engineering.
- Previous Core Logging (Geological and Structural) experience would be considered an asset
- Previous experience in Magmatic Cu-Ni Sulphide Deposits is preferable but not necessary
- Knowledgeable in the principles and methods used in a deep drilling surface and UG diamond drill program
- Demonstrated ability and experience using mine modeling software; Datamine (DHLogger). ArcGis would be helpful
- Familiar with Microsoft Office Suite

- Ability to communicate effectively, both written and verbal, with various individuals, crews, departments, and organizational levels. This position requires proficiency in both written and spoken English. You will be expected to be a skilled communicator and be result-oriented, flexible, and capable of working independently and as part of a team, with the aim of contributing to the company's development.

How to Apply:

- Email resumes and credentials to careers@premiumnickel.com
