

JOB POSTING #Surveyor

SURVEYOR

Premium Nickel Resources Botswana (PNRB) is seeking a Surveyor. Reporting to the Senior Geologist, the Surveyor is part of the Geology Department and collaborates with other departments of the mine. The incumbent will play an important role in terms of surveying drill layouts (Azimuth), and efficient downhole surveying.

Specific responsibilities include, but not limited to:

- Ensuring that COVID-19 protocols are followed
- Ensure accurate downhole survey of Underground and Surface drillholes.
- Ensure proper QAQC of downhole surveys pass in order to obtain high confidence in drillhole trace data
- Underground/Surface layout for Azimuth's of drill collaring activities
- Assisting in the Exploration Core yard as needed with duties such as:
 - Rotate and align drill core, record MagSus and Conductivity in addition to core RQD
 - Rotate and mark Bottom of Hole line when dealing with Oriented Core
 - Attend and participate in the Safety and Geology meetings

Qualifications:

- Ability to utilize Survey related software, Microsoft Office Suite Software.
- Previous Survey Experience (Surface and Underground) would be considered an asset
- Ability to communicate effectively, both written and verbal, with various individuals, crews, departments, and organizational levels. This position requires proficiency in both written and spoken English. You will be expected to be a skilled communicator and be result-oriented, flexible, and capable of working independently and as part of a team, with the aim of contributing to the company's development.
